

# Trends in UBTEB Assessment/ Examinations

Number of registered candidates for final year examinations steadily increased for both gender from 2012 to and slightly dropped in 2017. This slight drop was attributed to the ministerial guidance to terminate the One year post O-level Business certificate programs and introduced the two years programs. Just as it begun to increase in 2019, number of registered candidate for final year examinations was negatively affected and it again dropped drastically in 2020 due to COVID-19 pandemic.
